

NAME

lsattr – list file attributes on a Linux second extended file system

SYNOPSIS

lsattr [**-RVadlpv**] [*files...*]

DESCRIPTION

lsattr lists the file attributes on a second extended file system. See [chattr\(1\)](#) for a description of the attributes and what they mean.

OPTIONS

- R** Recursively list attributes of directories and their contents.
- V** Display the program version.
- a** List all files in directories, including files that start with ‘.’.
- d** List directories like other files, rather than listing their contents.
- l** Print the options using long names instead of single character abbreviations.
- p** List the file’s project number.
- v** List the file’s version/generation number.

AUTHOR

lsattr was written by Remy Card <Remy.Card@linux.org>. It is currently being maintained by Theodore Ts’o <tytso@alum.mit.edu>.

BUGS

There are none :-).

AVAILABILITY

lsattr is part of the e2fsprogs package and is available from <http://e2fsprogs.sourceforge.net>.
