NAME
lround, lroundf, lroundl, llround, llroundf, llroundl − round to nearest integer

SYNOPSIS
#include <math.h>

long int lround(double *x***);**
long int lroundf(float *x***);**
long int lroundl(long double *x***);**

long long int llround(double *x***);**
long long int llroundf(float *x***);**
long long int llroundl(long double *x***);**

Link with −*lm*.

Feature Test Macro Requirements for glibc (see feature_test_macros(7)):

All functions shown above:
_ISOC99_SOURCE || _POSIX_C_SOURCE >= 200112L

DESCRIPTION
These functions round their argument to the nearest integer value, rounding halfway cases away from zero, regardless of the current rounding direction (see fenv(3)).

Note that unlike the round(3) and ceil(3), functions, the return type of these functions differs from that of their arguments.

RETURN VALUE
These functions return the rounded integer value.

If *x* is a NaN or an infinity, or the rounded value is too large to be stored in a *long* (*long long* in the case of the **ll*** functions), then a domain error occurs, and the return value is unspecified.

ERRORS
See math_error(7) for information on how to determine whether an error has occurred when calling these functions.

The following errors can occur:

Domain error: *x* is a NaN or infinite, or the rounded value is too large
An invalid floating-point exception (**FE_INVALID**) is raised.

These functions do not set *errno*.

VERSIONS
These functions first appeared in glibc in version 2.1.

ATTRIBUTES
For an explanation of the terms used in this section, see attributes(7).

Interface	Attribute	Value
lround(), **lroundf**(), **lroundl**(), **llround**(), **llroundf**(), **llroundl**()	Thread safety	MT-Safe

CONFORMING TO
C99, POSIX.1-2001, POSIX.1-2008.

SEE ALSO
ceil(3), floor(3), lrint(3), nearbyint(3), rint(3), round(3)

COLOPHON
This page is part of release 4.16 of the Linux *man-pages* project. A description of the project, information about reporting bugs, and the latest version of this page, can be found at https://www.kernel.org/doc/man−pages/.
