

**NAME**

**addpart** – tell the kernel about the existence of a partition

**SYNOPSIS**

**addpart** *device partition start length*

**DESCRIPTION**

**addpart** tells the Linux kernel about the existence of the specified partition. The command is a simple wrapper around the "add partition" ioctl.

This command doesn't manipulate partitions on a block device.

**PARAMETERS**

*device* The disk device.

*partition*  
The partition number.

*start* The beginning of the partition (in 512-byte sectors).

*length* The length of the partition (in 512-byte sectors).

**SEE ALSO**

[delpart\(8\)](#), [fdisk\(8\)](#), [parted\(8\)](#), [partprobe\(8\)](#), [partx\(8\)](#)

**AVAILABILITY**

The addpart command is part of the util-linux package and is available from <https://www.kernel.org/pub/linux/utils/util-linux/>.
